We bring you our technological vision

A great name in bearings

For nearly a century SNR has concentrated on the design, development and manufacture of bearings, for fields where these components, usually unseen, play a fundamental and sometimes vital role. Through its sales network, our company today is present in more than 200 countries spanning 5 continents.

A specialist's approach, three main areas of competence

▶ AUTOMOTIVE

The European reference
 Creator of ASB® (Active Sensor Bearing), an instrumented bearing that is a worldwide standard. SNR supplies, since 2003, 8 of the 10 most sold vehicles in Europe.

▶ AEROSPACE

Partner of the first Airbus A380 flight, the largest aircraft in the world
 SNR serves the major aeronautical and space programs: the CFM56 jet engine, which is the most selected engine for Airbus and Boeing aircraft, the European launcher Ariane 5 and continues to be the European leader for supply of helicopter transmission bearings.

▶ INDUSTRY

Partner of the TGV® since its debut
 Both for OEM and aftermarket, SNR is serving major industries such as textile, robotics, steel, food, paper mills, railway...

A comprehensive and competitive offer

▶ Products suited to your needs

- Standard range: standardised bearings, maintenance products, Automotive Aftermarket range, ...
- Specific solutions: special bearings integrating several functions, high technology bearings (mechatronics, ceramics, etc.), ...
- Linear Motion: guiding rails, standard axes and customised systems...

▶ Expert support and service, the guarantee of our commitment

- Technical assistance, analysis, test centres, specialised laboratories,
- Training related to bearings,
- Maintenance: vibration analysis, assembly-disassembly of bearings, shaft alignment, ...
- Repair of aircraft or railway bearings, ...
- Electronic catalogues, online ordering, EDI...

The experience of our people is an essential component of our bearings

Choosing the right bearing closely depends on the specific application and the environment in which it will be working.

This is why the knowledge of our people, their availability, their listening capabilities and their initiative are at the heart of the SNR approach.

IDENTITY
